Professional Summary

Detail-oriented IT Support professional with hands-on experience supporting end users, troubleshooting system and software issues, and managing ticket queues in fast-paced environments. Strong communicator with the ability to quickly learn new SaaS platforms, assist users through technical workflows, and maintain accurate documentation. Experience includes Active Directory, Windows environments, and remote support tools. Currently working in a high-volume, client-facing role requiring strong analytical and problem-solving skills. CompTIA Security+ 2026.

Core Skills

SaaS Application Support • Software Implementation Support • Ticket & Case Management
Client Communication (Email & Calls) • Task & Queue Management
System Configuration & Validation • Documentation & Process Tracking
Windows 10/11 • Active Directory • DNS/DHCP Fundamentals
ServiceNow • Jira • Remote Support • Troubleshooting
Time Management • Multitasking • Problem Solving

Technical & Project Experience

Windows Server & AD Homelab — Built and managed a domain environment with Active Directory, DNS, and DHCP; configured users, permissions, and group policies while troubleshooting access issues.

Database Search Web Application — Developed a React + MySQL application focused on structured data handling, validation, and query functionality.

RAG Chatbot — Implemented a chatbot using OpenAI APIs to analyze PDFs, demonstrating ability to learn new technologies and support data-driven workflows.

Portfolio Website — Designed a responsive website using React and Tailwind CSS with a focus on usability and clean design.

Professional Experience

Senior Workers' Compensation Claims Adjuster — Gallagher Bassett (2026–Present)

- Manage high-volume workload while maintaining accuracy, documentation, and compliance
- Analyze complex cases, strengthening investigative and problem-solving skills
